

SUGUNA KANTE

Full Stack Software Developer | Computer Science Undergraduate (B.Tech CSE, 2027)

Andhra Pradesh, India | +91 9515818382 | kantesuguna80@gmail.com | [GitHub](#) | [LinkedIn](#) | [LeetCode](#) | [HackerRank](#)

SUMMARY

Computer Science undergraduate (B.Tech,2027) with a strong foundation in Data Structures, Algorithms, and Object-Oriented Programming. Full Stack Developer experienced in building and deploying web applications using the MERN stack (MongoDB, Express, React, Node.js), PostgreSQL, and RESTful APIs. Skilled in software development life cycle (SDLC), version control (Git/GitHub), debugging, and API integration. Quick learner with a quality-first mindset and hands-on experience integrating Generative AI (Groq API, Llama 3.3 70B) into production applications.

TECHNICAL SKILLS

- **Languages:** C, C++, JavaScript, Python, SQL
- **Web Development:** React.js, Django, Node.js, Express.js, REST APIs
- **Databases:** PostgreSQL, MongoDB
- **AI / Machine Learning:** Groq API, Llama 3.3 70B, Prompt Engineering, Generative AI
- **CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, SDLC
- **Tools & Platforms:** Git, GitHub, VS Code, Debugging, Deployment, Render

EXPERIENCE

Full Stack MERN Developer Intern - SmartBridge

May 2025 - July 2025

- Built and maintained full-stack web applications across all four layers of the MERN stack (MongoDB, Express.js, React.js, Node.js) and REST APIs, collaborating within a 4-member agile development team.
- Diagnosed and resolved software bugs across multiple web modules through systematic debugging and testing, improving overall module reliability.
- Followed SDLC best practices and used Git for version control while collaborating with a 4-person cross-functional team on feature delivery.

PROJECTS

Student Management REST API | Node.js, Express.js, PostgreSQL, JWT

- Developed a RESTful API with Node.js, Express.js, and PostgreSQL featuring role-based access control across 2 user roles (admin/student), full CRUD operations, and input validation.
- Modeled relational database schemas in PostgreSQL for students, courses, and enrollments, using foreign keys and joins to handle multi-table queries efficiently.
- Secured API endpoints with JWT authentication and implemented structured error handling with meaningful HTTP status codes.

TaskFlow Pro | Node.js, Express.js, PostgreSQL, React.js, Groq AI

- Built a full-stack AI-powered task management application with Kanban boards, task scheduling, project management, analytics, and secure JWT-based authentication.
- Developed RESTful APIs using Node.js and Express.js for users, tasks, projects, comments, and AI features, backed by a PostgreSQL relational database.
- Integrated Groq AI (Llama 3.3 70B) to power 5 AI features - task prioritization, description enhancement, task breakdown, daily summaries, and AI chat; deployed the application on Render.

EDUCATION

Aditya College of Engineering and Technology - Surampalem, Andhra Pradesh

B.Tech in Computer Science and Engineering

CGPA: 8.86 / 10 | 2023 - 2027

CERTIFICATIONS & COMPETITIVE PROGRAMMING

- Generative AI Fundamentals - Google Cloud
- 5-star rating in Problem Solving, C, C++, and SQL - HackerRank
- 500+ difficulty-rated problems solved - CodeChef
- SQL (Basic) & Problem Solving (Basics) certifications - HackerRank
